Education

San Diego State University – B.S. Mechanical Engineering

2024 – 2026

Relevant Coursework:

- **Engineering Components Design** – Application considerations in design, fatigue stresses and factors of safety, spline and gear study, torsion bar and gear train projects
- **Applications of Thermodynamics** – refrigeration/heat pump cycles, Rankine, Brayton, Otto, and Diesel cycles
- **Mechanics of Composites** – Stress/strain analysis of composites, CFRP performance under lightning strikes, ABD laminates

Sierra College – A.S. Mechanical Engineering, A.S Physics

2021 – 2024

Hands-on laboratories completed: Materials lab, Circuits lab, and several Physics labs

Experience

Maintenance Lead

Nov 2025 - Present

Associated Students Building Services

- Performed preventative maintenance and repairs on HVAC, electrical, and plumbing systems
- Serviced HVAC systems: air handlers, fan coils, VAVs, evaporative coolers, and exhaust fans
- Serviced electrical equipment: VFDs, relays, inverters, solar systems, and a range of motors
- Serviced plumbing systems: Pumps, water heaters, heat exchangers, radiant systems, and domestic components
- Worked alongside Building Services Engineer and Building Services Coordinator
- Led team of assistants and delegated tasks
- Managed workflow including outsourcing and contractor interactions

Skills

- Development of multi-system aerospace designs
- Operation of industrial machinery and power tools
- Experience with engineering drawings and several CAD programs
- Experience with several coding languages including PLC
- Aware of OSHA safety standards and common safety procedures
- Experience with ASTM testing machinery
- Comfortable with CNC programming and operating
- Can use multimeter and similar electrical equipment
